

DAVID LLOBET NAVÀS

Principal Investigator

Institut d'Investigació Biomèdica de Bellvitge (IDIBELL)

Harnessing autophagy for the design of new therapies in womb cancer

DAY

December 20th
2023

TIME

12.30h

PLACE

0.22

SHORT BIO

David Llobet Navàs graduated in Genetics and Cell Biology in the Autonomous University of Barcelona after which he pursued a Ph.D. degree at the IRBLleida.

In 2009 he started his postdoctoral research at Columbia University and the Mount Sinai School of Medicine where he studied the role of miRNAs in the development of the mammary gland and in breast cancer.

In January 2016 he was appointed Principal Investigator at Newcastle University until 2018, when he relocated to IDIBELL.

His laboratory is focused on the fields of womb cancer and the biology of the miR-424/503.
